

| Designing and producing technological solutions for industrial cutting since 1960.

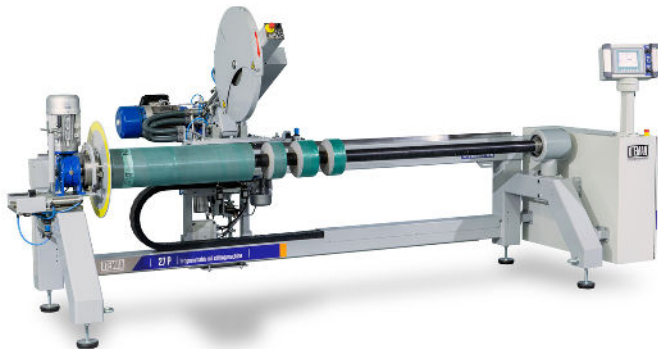

High cutting precision - Reducing production costs - Minimal machine maintenance

Materials: **polypropylene, polyester, nylon, non-wovens, films, foils, felt, mesh, teflon**, among others.

| SHARP C-LA | Automatic laser cutter

- ✓ Cutting precision for all types of materials and complex contour designs.
- ✓ Contactless cutting avoid material deformation.
- ✓ Sealed edges to eliminate fraying.

| 27P | Automatic roll slitting machine

- ✓ Enable cutting rolls with different diameters, lengths, and weights in bands or stripes.
- ✓ Available with fixing shaft or rollers.

| 10 A | Roll carroussel

- ✓ Available in 1, 2, or 3 towers.
- ✓ The control software provides real-time information to the operator for each roll.

Our experienced engineering team is ready to develop any type of customised project, adapting and providing solutions to meet your company's technical requirements. **Can we help you?**
